

CARB Diesel Truck Rules – Compliance Options and Reporting Requirements for 2017 (Course #521.7), and Reinstating Your AG Exemption Status

Do you own, operate, or dispatch heavy-duty diesel trucks in or to California?

This course gives you the information you need about how to comply with California Air Resources Board (CARB) diesel regulations with an emphasis on what you need to do to be compliant for 2017. There are important deadlines January 1st and January 31st.

Do you know if your diesel vehicles have lost the AG or Low Exemption status?

Early in 2016, CARB conducted an audit of truck information and mileage reporting from the TRUCRS online reporting system. If any information was missing (ex: missing odometer reading), the status of that truck was changed to “None”. In most cases, that creates a non-compliant status for the CARB rule leading to potential fines. View your TRUCRS account and check the status of your vehicles using the Low Mileage AG provision. For more information about how to reinstate, contact CARB and join us at the January 11th presentation for 2017 information and invaluable one-on-one assistance.

<u>Date and Time</u>	<u>Location</u>
Wednesday, January 11, 2017 9:00 a.m. – 11:00 a.m.	Sonoma County Farm Bureau 970 Piner Road Santa Rosa, CA 95403
